Sumo Engineered Hardwood

MC 6236-02

Relative Space

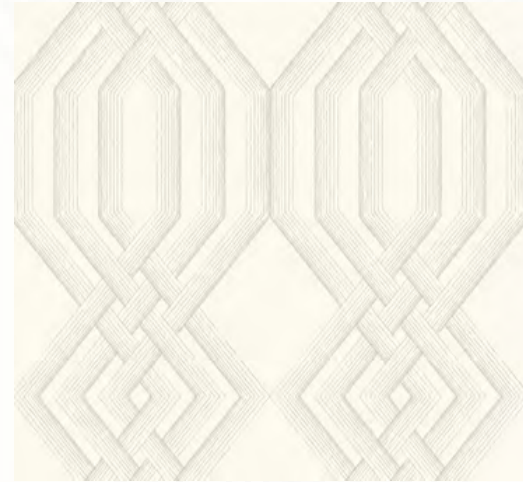

Sumo is a wide-plank engineered wood flooring collection. It comes in 17 different colour options and you have the option of selecting a glossy or matte finish. I chose this floor to be used in the kitchen, dining room, and family room. I selected the MASAJI colour because I felt that the darker wood would contrast the lighter whites and blues of my other design selections in these rooms. This flooring is sound absorbing, and has high colourfastness, fire resistance, scratch resistance, stain resistance, wear resistance and water resistance. It is FSC and CARB 2 certified, and it is easily recyclable and has low toxicity (E1 certified for adhesives).

Eco Canvas Wallcovering

MC 6819-03

Astek Inc.

This eco canvas wallcovering is composed of recycled polyester fabric, and is finished with EverGreen, which is a water based biodegradable and zero VOC coating. The manufacturer, Astek wallcoverings, has hundreds of designs, while also offering the option for custom designs. Digital printing is also available using eco-friendly UV digital inks. All of their wallcoverings are class A fire rated, and it can be used in both residential and commercial spaces. I selected this wallcovering for the dining room. I wanted something neutral that would add a bit of texture and dimension to the walls. This wallcovering is sound absorbing, and has high colourfastness and fire resistance. It has medium scratch resistance, stain resistance, tear resistance, UV resistance, wear resistance, and water resistance. In terms of sustainability, it is low/no VOC and is made from recycled materials.

Bio-Floor

MC 5921-01

Earth Weave, Inc.

Bio-Floor is a 100% natural woolface fiber biodegradable carpet. It comes in a variety of colour options and loops so that you can achieve your desired design look. I am using this finish as broadloom carpet flooring for the office. I wanted to use a neutral colour to ground the space and have a fresh palette to work off of. This carpet is chemical free, meaning it does not contain harsh dyes or any chemical bonding agents. This carpet is sound absorbing, and has high colourfastness, fire resistance, tear resistance, UV resistance, and wear resistance. It has medium chemical resistance, stain resistance and water resistance. In terms of sustainability, it is low/no VOC and is made from renewable materials.
